

**Windows 7 Start Button Creator** is a free tiny portable tool that allows you to create a **Windows 7 start orb/button with ease**

**Here is what we will end up with.**

## How to use:

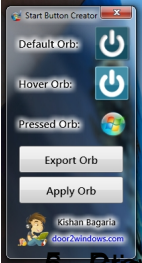

1. Run the tool.

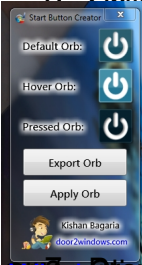

2. Click on the image near **Default Orb**.

1. Browse for the image and **Hover Orb** to use as the default orb state.

2. Browse for the image and **Pressed Orb** use as the hover orb state.

3. Click **Export Orb** that you want to use as the pressed orb state first then click **Apply** to save the orb. You can also click **Apply** to test.
